WELCOME MESSAGE

I am honored to welcome you to the 14th edition of CONFER 2025, an event that has, year after year, become a true tradition of professional collaboration and friendship.

In a constantly evolving medical world, events like this one are essential for bringing together experience, innovation, and empathy—three values that define modern medicine.

Previous editions of CONFER have demonstrated that science and experience go hand in hand, and that the collegial spirit that brings us together in Iasi is the driving force behind medical progress.

We thank you for your presence, your involvement, and your willingness to share experience, ideas, and hope in the fight against cancer. Over time, CONFER has become a community of specialists and friends, united by the desire to collaborate and by respect for human suffering.

Once again this year, I wish for an inspiring edition, filled with valuable dialogue and positive energy, in the service of our patients and of life itself.

Lucian Miron MD, PhD
